- ✓ Short delivery Times
- ✓ Small minimum quantity
- ✓ Premium printing technologies
- ✓ Flexible logistics

Promotional items for all senses.

Our products
taste, refresh, care, scent and protect.

Our products are communicative agents
to transmit your individual advertising message.

Our products are in fact very different –
but one thing they do have in common:

*They delight the recipients and have a real added
value. For consumers and your company.*

We develop, produce and deliver our products
under consideration of the protection of our
natural resources; of course, we keep to QS processes
and we work in correspondance with the European norms
for food and cosmetic products.

Tested and qualified
formulas

Optimized
quality management

Production and processes
according to ISO:9001 regulations

We produce in:

Germany

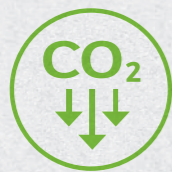

Austria

Switzerland

We take responsibility:

- ✓ for our products
- ✓ for our consumers
- ✓ for our behavior
- ✓ for nature and environment

We constantly work on the reduction of our CO₂ emissions. We offset unavoidable ones.

We use compostable materials made from renewable resources.

We use paper from sustainable and controlled forest cultivation.

We purchase green power from 100 % renewable sources.

We are certified organic producers according to EG Bio Regulation

We work on getting better every day

Climate change and voluntary climate protection

More than 2° global warming are too much - all scientists are as one on this.

By today's standards economical activities are always related to CO₂ emissions. Besides national aims to reduce greenhouse gases the voluntary climate protection plays a significant role.

No matter how economical or efficient a company or our actions are, some emissions remain unavoidable. Without a massive expansion of the climate protection mankind will not be able to solve the problem of the global warming.

Climate protection projects save CO₂ emissions - no matter where in the world.

Greenhouse gases like CO₂ spread evenly in the atmosphere - hence, we have the same concentration all over the world. With regard to the greenhouse effect it is absolutely irrelevant where on earth the emissions are caused and where they are balanced.

Certified climate protection projects make a proven and important contribution to fight against the global warming.

Climate-neutral company

The climate neutrality of our company supports the sustainable reforestation as part of a certified climate protection projects according to CCBS Gold Standard in Papua New Guinea. By offsetting our company's emissions we support climate protection and emphasize our sustainability engagement.

recycled material loops and raw materials

Products need packagings

Packagings are necessary

- ✓ to **protect** our products
- ✓ to **keep** them **fresh**
- ✓ to make them **transportable and** to **preserve** them

Sustainable raw materials

We stand up for using sustainable raw materials in any case the current stage of research and technology enable us to do so. By using recycled and compostable materials we save great quantities of fossil resources and reduce the impacts on the world climate.

Closed recycled material loop

Closed recycled material loop have a significant impact on the worldwide resource efficiency. Hence, we constantly seek to optimise the recycling capability of our articles. Even when producing the goods, we carefully take in consideration which raw materials will be given into the loop. There is no need to reproduce reusable goods.

Reduction of material usage

We reduce the quantity of material usage in any case possible and sensible. Thus, the environmental impact is reduced and valuable resources are saved.

Did you know about PET bottles...

PET bottles are not only sustainable but also

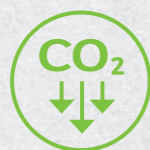

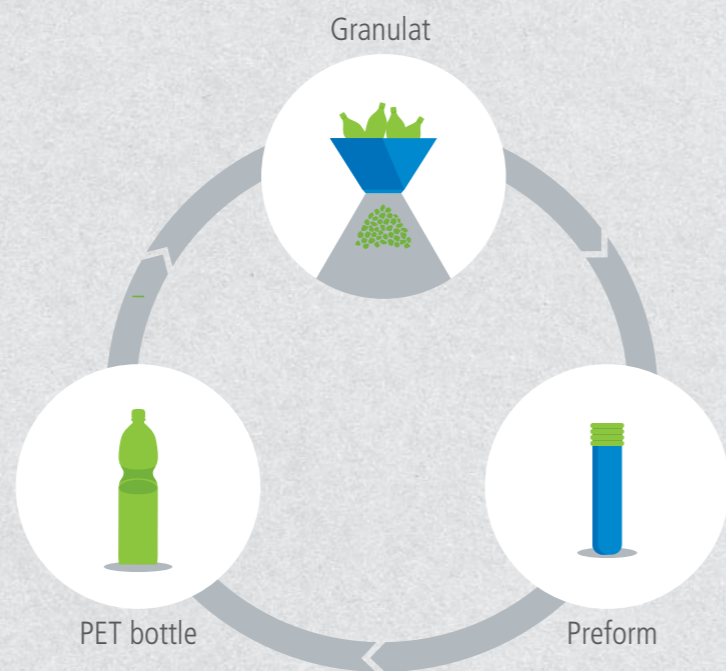

- ✓ **Light:** they are significantly lighter than returnable glass bottles
- ✓ **Safety:** there is no danger of breaks and severity
- ✓ **Cleanness:** due to the deposit they are wanted and do not messy public locations

97% Recycling

A PET bottle is the second most recycled beverage packaging with a recycling quote of 97.3 % (no 1 is the drinking can).

Fully recyclable

PET one-way bottles waste considerably less energy as they are produced at the place of filling.

PET will be recycled very efficiently with a quote of 97 % in the closed loop.

By using 100 % recycling material 1.6 tons CO₂ are saved.

Example for sustainability: Mineral Water

Bottle made from 100 % recycled PET with Eco Label from ecological forest cultivation

500 ml Bottle
100% recycled PET

Mineral Water

WATER

500ml bottle made from 100% recycled PET

Due to the usage of 100% recycled material the bottles show a slight colouring. This emphasizes the sustainability of the article but may differ in tone and intensity - even within delivery charges.

The no 1 for your marketing

Natural fresh mineral water from 70 m depth - filtered by rocks for thousands of years. Thus, the mineral water is especially pure and neutral in flavour. It is a natural provider of minerals and trace elements. By this unique composition it is perfect for a refreshing advertising presence!

Advertising water bottles are allrounders and universally useable – on fairs, conferences or outdoor events.

Did you know about beverage cartons...

75%

made from sustainable raw material

Original Tetra Pak®-Carton – from sustainable and controlled forest cultivation

CO₂-efficient compared to reusable packaging

The recycling procedure for beverage cartons is easy: the paper fibres are separated from the plastics by water and mechanical actions.

The beverage cartons are made of valuable raw materials which are the basis for new products.

Water Tetra Pak Carton

The perfect, price-attractive give away for promotions, fairs and events.

The shelf life is 24 months as of filling. We will always deliver freshly filled goods – only a few days after production.

Did you know about beverage cans...

Cans are not only sustainable but also:

- ✓ **Light:** they are significantly lighter than returnable drinks
- ✓ **Safety:** there is no danger of breaks and severity
- ✓ **Cleanness:** due to the deposit they are wanted and do not mess public locations

Example for sustainability:

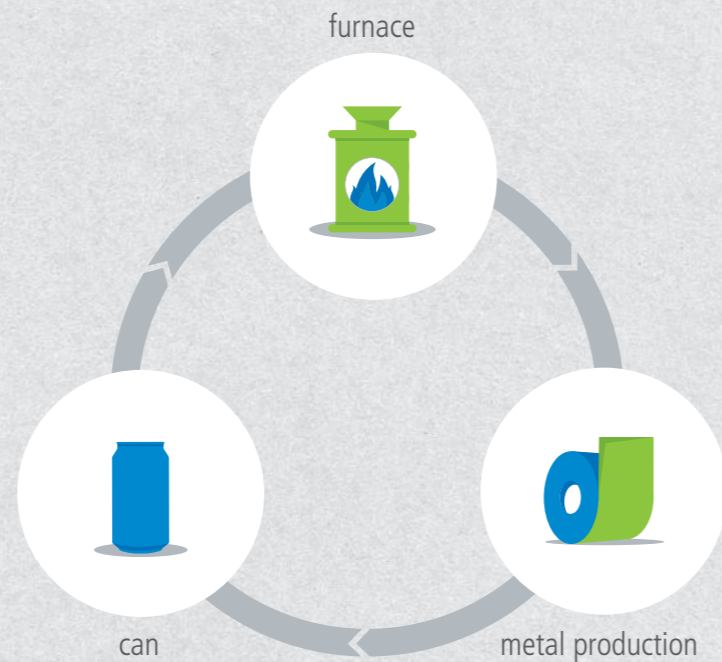

Cans made of 100% recyclable aluminium with Eco Label made from ecological forest cultivation

99% Recycling

The can is the most recycled beverage packaging with a recycling quote of 99 %.

can be recycled fully and infinitely

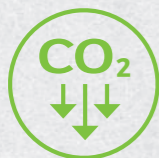

can be infinitely recycled

paper from sustainable and controlled forest cultivation.
Eco Label

in recycled material loop
99% recycling quote

Each recycled can saves up to ten times its weight of so-called CO2 equivalents.

Aluminum will be recycled very efficiently with a quote of 99 % in the closed loop.

A success story: 80 % of all produced beverage cans are still in circulation.

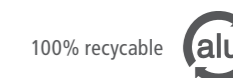

Iso Redberries

Returns lost power

A delicious combination of red berries like strawberries, raspberries and blackberries refreshes when exercising, being en-route or in the office. The drink contains calcium, magnesium, zinc and l-carnitine, and is perfectly suitable for active promotional messages.

Light Beer

A handsome marketing fellow

Beer suits very well for every kind of company event or for the catering at the exhibition stand and its party. The 6-pack variant is a perfect guest-present for internal divisions at your client's. The modern and handy can communicates a cool image – totally different to common canned beer! The slightly malty beer is not too harsh and is an enjoyable beverage for men and women. Always sparkling and fresh – stimulating for each event.

Optional: six pack

As a gift the six pack pleases whole departments and teams at your clients'.

CoffeeBag

The natural alternative to common coffee caps.

The coffee filters in mini size are not burden the environment and is very easy to use. The filter unfolds when opening and is promptly ready to use: simply put it on the cup and pour with boiled water - ready.

COFFEEBAG - FUNCTIONALITY

Aroma packaging

Always fresh

Each order will be freshly roasted, promptly filled in the CoffeeBag, protectively packed into the arome bags and immediately shipped.

Printing

4c CMYK, as of 500 pieces

Aroma bag made of 100 % kraft paper
Optionally natural brown, black or white.

So simple:

- 1 Tear the CoffeeBag
- 2 Put it on the rim of the cup
- 3 Pour with boiled water

Video:

Manual drum roasting

The aromas and the ingredients conserved in the green coffee bean are activated by the method of roasting. It is the art of the roaster to set them free and to create an unique coffee experience. Coffee is one of the most complex natural product. Whereas wine contains about 400 aromas, coffee comprises 800 flavours. Hence, we roast each order freshly for shipping.

»»» The coffee beans are continuously stirred in a roast drum rotating over a flame. Hereby, they are roasted consistently, slowly and gently. Unlike in case of the fluidized bed roasting which is often used from the industry, several settings - like temperature, air feed, movement of the beans and duration - can individually be adjusted as needed. To achieve the best possible result, the roast master mainly needs competence, expertise and his senses. Colour, shape, compound and smell of the beans are verified constantly during the roasting process. All steps are done slowly and controlled: aromas and flavours can be developed perfectly.

Excellent roast master

Our roast master rank among the best. They are specialized in discovering all aromatic secrets by knowledgeable and manual roasting. Coffees with unique characters are the result from the combination of technical knowledge, expertise and sensitivity.

DRUM ROASTING, ROAST MASTER

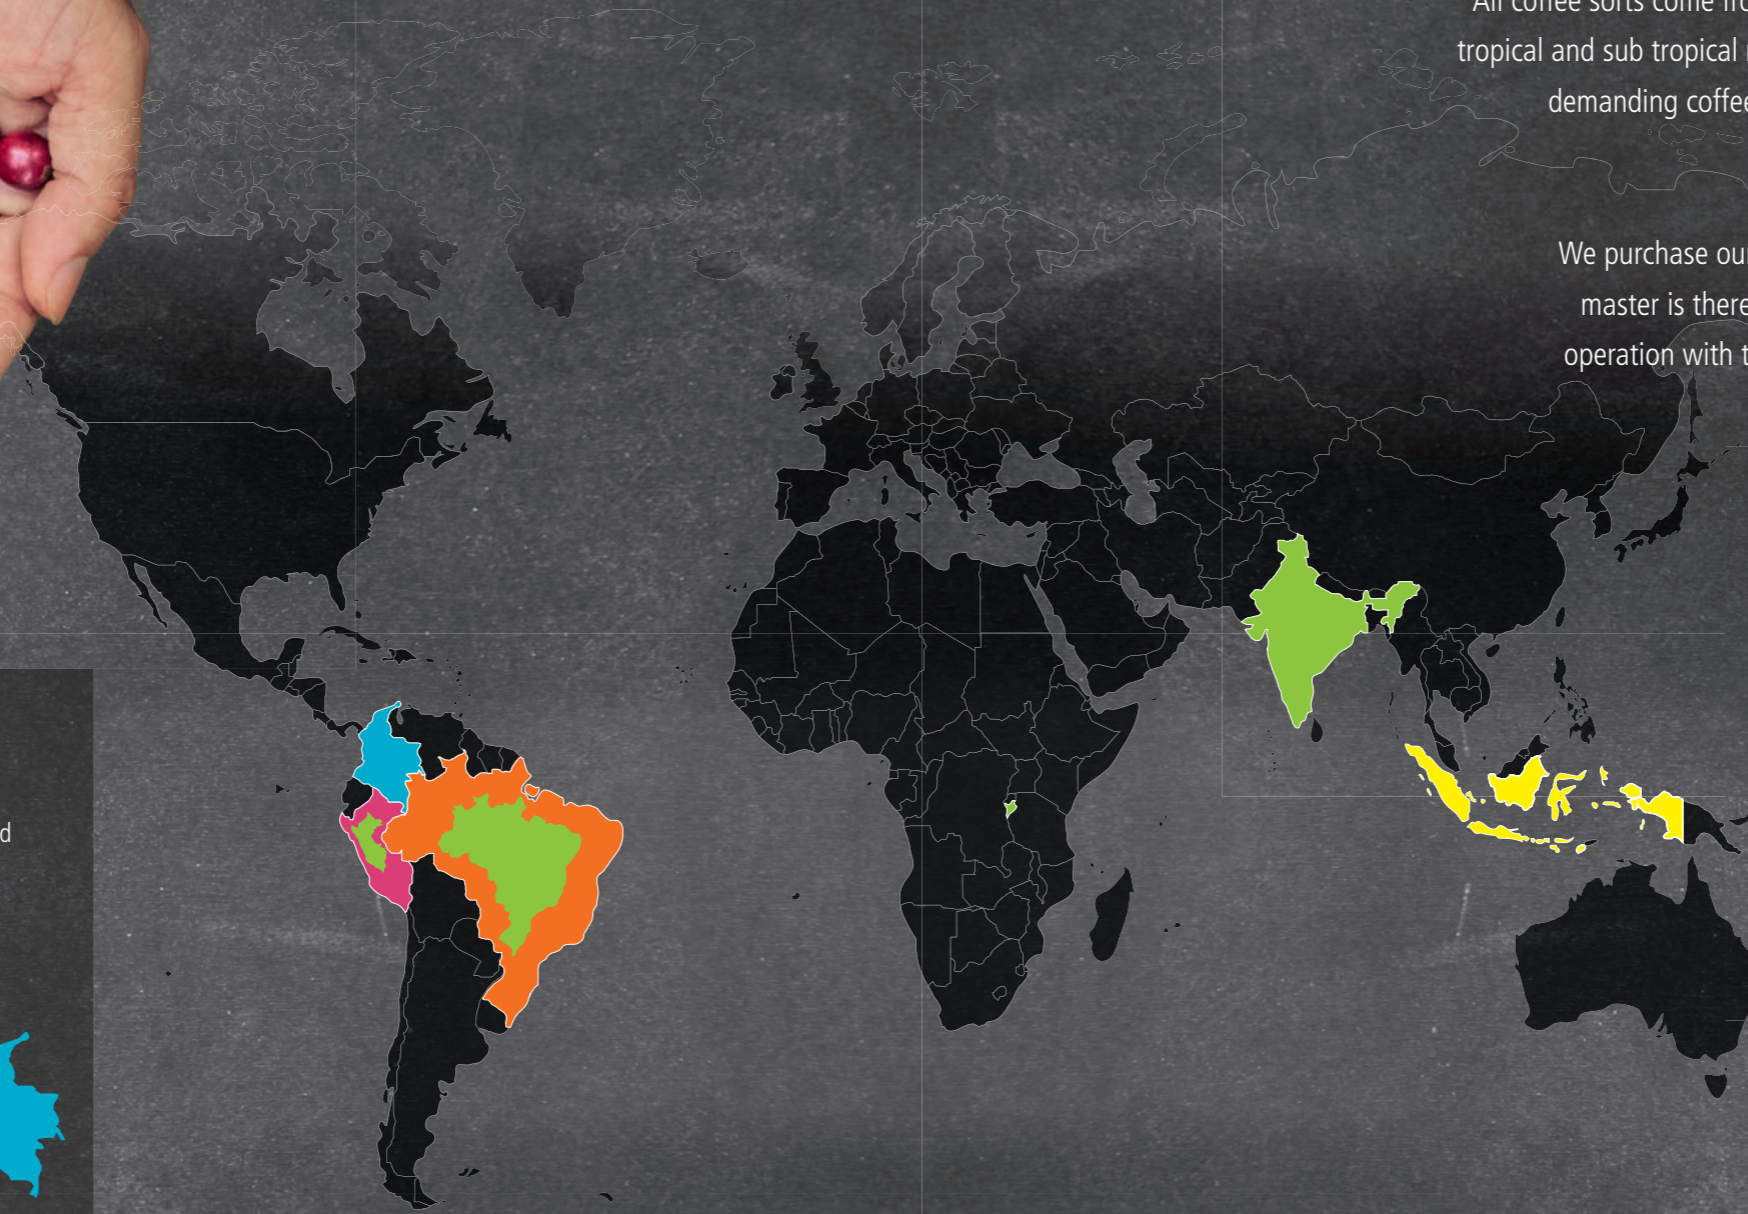

Sorts & Origin

All coffee sorts come from countries in the so-called coffee-belt - means the tropical and sub tropical regions around the equator. Excellent conditions for demanding coffee plants: good soils, mild climate, sufficient humidity.

We purchase our beans from small, family-run plantations. Our roast master is there in person on a regular basis and has a trusting co-operation with the coffee farmers. They are paid fairly to be able to operate on a sustainable basis.

We purchase our beans from small, family-run plantations. Our roast master is there in person on a regular basis and has a trusting cooperation with the coffee farmers. They are paid fairly to be able to operate on a sustainable basis.

Black Brick

100 % Unmixed, origin, hand-picked and freshly ground arabica coffee from Columbia. Decaffeinated by the gentle CO2 method.

Hand Cleansing Gel

antibacterial

Daily hygiene for en-route

Hygiene is a significant topic in our daily life: we shake hands, count coins, touch door handles and use public transportations. We are used to take a snack-to-go and to cater us on route. In these situations the antibacterial hand cleansing gel is promptly and easily applicable – without any water. The hands immediately feel clean, fresh and cared.

Handbalm

Calendula-Aloe Vera

Perfect for the care of dry, cracked and stressed hands
The essences of the calendula contain a variety of natural anti-inflammatory substances and essential oils. Aloe Vera has a cooling, pleasing and calming effect. The advantages of both medicinal plants are combined in this rich formula and result in a quickly penetrating moistening balm. Perfect for the care of dry, cracked and stressed hands.

Handbalm

Ginger-Lime

Light texture with refreshing scent

Due to its allaying effect ginger is used by the traditional Chinese medicine. It contains ingredients catching free radicals, activating the micro circulation of your skin, being stimulating and warming. The moistening balm penetrates quickly. The freshness of the limes and the natural aroma of the ginger complete this pleasant flavour composition.
